

OregonRocketry (OROC) is an Oregon State not-for-profit corporation dedicated to the promotion of Model, High Power and Amateur Rocketry. Based in Portland, we are affiliated with: Tripoli Rocketry Association and the National Association of Rocketry. OROC provides a safe and family friendly adherence to strict safety codes, in compliance with the Federal Aviation Administration and the National Fire Protection Association, along with local regulations.

Sheridan - Home of Fillible's Folly launch, is located about 45 miles SW of Portland on a sprawling grass field. A 5,400' AGL FAA approved waiver provides ample opportunity for large model rockets, including 'J' motors. Lodging is available nearby in McMinnville. Our family friendly fees are:

\$10 individual low power and \$20 high power.

Brothers - A remote high desert range 41 miles East of Bend, Oregon on Hwy 20. You can fly it all here from model rockets to high power level 3. The FAA standing waiver is 20,500' AGL with windows to 42,280' AGL. Brothers is home to the regional NXRS research launch in mid-summer where the big stuff flies.

Launch fees are \$20 individual, \$30 family.

Both launch sites have toilet facilities and unimproved camping space (although space at Sheridan is limited). Please note site rules for campfires, etc. posted on our website. We also have vendors on site for all your rocketry needs.

Brothers at Dusk
